

COMPANY OVERVIEW

OUR STORY

Founded in 1988, TBC has the expertise and agility to design, manufacture, and install consoles for any sized control room. We provide products and expertise to create ergonomically correct and organized workspaces utilizing our adaptable and modular technical furniture.

Our success is only possible due to the highly qualified team that works with us worldwide to fulfill the requests and demands of the market. Our philosophy is to study and listen to each clients' needs to understand what is required and transform this into an ideal solutions that meets these needs.

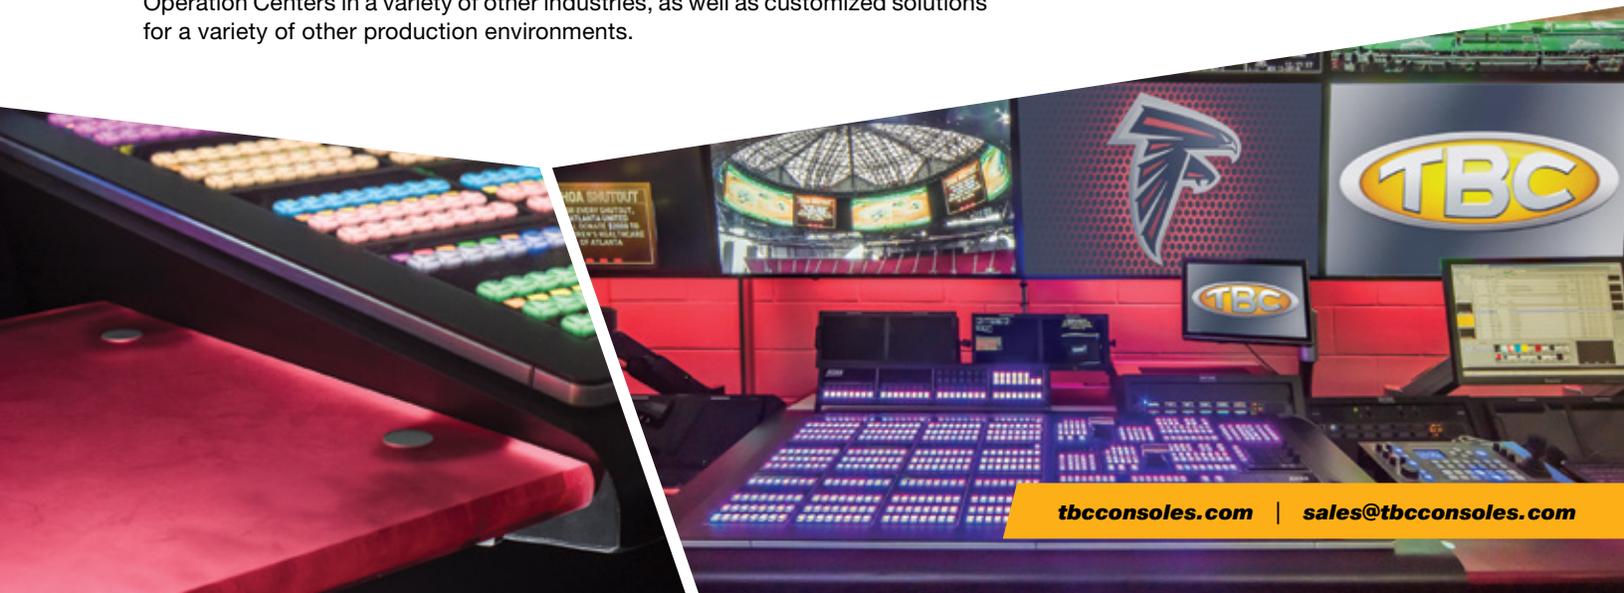

TBC's priority is to provide high quality and precise solutions to our customers. We get this by manufacturing and assembling all products in our own production plant, sourcing local components, and test-fitting the products in our warehouse to ensure quality and accuracy of each and every project that dispatches from our facilities.

Our company has grown over the years and is now located in two buildings – comprising over 30,000 square feet in Long Island, NY. To support the quality and precision in our solutions, our qualified team assembles every product in our facilities before delivering to the client. Should there be any issue on site, our consoles are backed with a Lifetime Warranty with a unparalleled commitment to customer service so we can quickly solve all issues on their rare occurrence.

SPECIALIZED FOR **BROADCAST AND BEYOND**

TBC is recognized worldwide especially in Broadcast Television and Radio environments. We pride ourselves for this specialization as it acknowledges our ability to incorporate highly specialized equipment into our consoles and understand how it is to be used by the client. We understand the needs of the industry and stay up to date on the latest trends and advances.

For the past 30+ years, we have witnessed production environments evolve where modern needs continue to push the capabilities of technology. Process automation has allowed three people have been consolidated into one with redundancy to ensure continuous operation like any mission critical control room. TBC also has expertise with Network Operation Centers in a variety of other industries, as well as customized solutions for a variety of other production environments.

Concept Only Rendering

CREATING SPACE **FOR NEW TECHNOLOGY**

Our design and engineering teams take clients from concept to reality with adaptive consoles that change as technology and industries evolve. TBC's byline reflects our philosophy to grow and evolve to the necessities of modern markets and new technology. Our highly qualified professional team works closely with our clients to address all concerns and incorporate their requirements into our design, as well as anticipate for the future.
